

Frontend Requirements & UI Layout Specification

Core Principles

- 1 Fast (instant response)
- 2 Clear (minimal clutter)
- 3 Minimal actions (1–2 clicks)
- 4 Beginner-friendly
- 5 Fail-safe (works without AI)

Main Layout Structure

Top Bar (64px)

Left Panel (320px)

Center Panel (Flexible)

Right AI Panel (360px, collapsible)

Bottom Service Flow (120px)

Left Panel - Library

- 1 Songs, Scriptures, Media tabs
- 2 Instant search with auto-focus
- 3 Scrollable list with hover states
- 4 Add/Edit/Delete items
- 5 Find items within 3 seconds

Center Panel - Preview & Live

- 1 Preview screen (next slide)
- 2 Live screen (projector output)
- 3 Smooth transitions
- 4 Next, Previous, Clear controls
- 5 Zero delay performance

Right Panel - AI (Collapsible)

- 1 Default collapsed state
- 2 Toggle via button or shortcut
- 3 Live transcription display
- 4 Detected scripture list
- 5 Project Scripture button

- 6 Expand/collapse under 200ms

Top Bar Controls

- 1 Next, Previous, Clear
- 2 Project Scripture (primary button)
- 3 AI toggle, Mic toggle, Settings

Bottom Panel - Service Flow

- 1 Drag-and-drop playlist
- 2 Horizontal scrolling
- 3 Instant item loading
- 4 Highlight active item

Design System

- 1 Dark theme default
- 2 Accent color (blue/purple)
- 3 Readable typography
- 4 Large buttons
- 5 High contrast visuals

Performance Requirements

- 1 UI response < 100ms
- 2 AI toggle < 200ms
- 3 Slide transitions < 200ms
- 4 No freezing during use

Detailed Layout Breakdown

- 1 Top Bar height: 64px
- 2 Left panel width: 320px
- 3 AI panel width: 360px (0 when collapsed)
- 4 Bottom panel height: 120px
- 5 Preview & Live panels stacked vertically
- 6 Service flow uses horizontal scroll cards
